講義概要/Course description

Bousai Trump

In Japan there are various natural phenomena based on geographical condition. In order to mitigate the damage caused by disasters, it is necessary to prepare for protecting lives and properties in terms of creating buildings, spaces and education. Throughout the classes we will study about overview of the communities for disaster prevention or mitigation. We will also focus on "Bousai Trump" as a tool. It is effective to create the opportunity to think and talk about risks for people through the generations. Our objective in this class is that students will be able to make the proposal of the tools, services, or events to facilitate communications.

Bousai Trump is playing cards. Through the Bousai Trump game, it provides the opportunity to think and surmise the way of self protection against disaster and various risks around the player. With "hazard" as trigger, the player is able to imagine what kind of "risks" does it take and how he or she can promote "recovery" after the incident occurred. The games in trump, such as Poker and Old Made (Baba-nuki), are familiar and well-known to many people, so Bousai Trump is easy to follow the consideration about disaster prevention and mitigation.

達成目標/Course objectives

Students will be able to:

- understand what is community and what makes bond in people.
- understand the disaster and the communities for disaster prevention in Sagamihara City and Kanagawa Prefecture.
- introduce and explain about own communities.
- understand gaming as a methodology for creating educational tools.
- make the proposal of the tools, services, or events to facilitate communications.
- create the opportunity to think and talk about disaster prevention and risks for people through the generations by playing Bousai Trump.
